To Whom It May Concern,

I have had the pleasure to work with and use the services of Business Continuity Services, Inc. (BCS) since 2001. From 2001 until 2006 I served as the Vice President of a Business Continuity software and services company and used the BCS team routinely. The professionals of BCS worked to develop assessments, impact and risk analysis as well as business continuity plans.

I found their staff to be of extremely high quality. Their customer focused approach was refreshing and greatly appreciated. Time and again I would receive compliments on their approach, methods and delivery. I never hesitated to work with the BCS team.

Their expertise is unmatched and they are well thought of in the business continuity industry. I highly recommend BCS for any of your business continuity requirements.

Please feel free to contact me with any questions that you may have.

Regards,
